THE NAVY SEALS OF AUTOMATION

Automation done correctly, securely and quickly.

Mentat is a small, elite team of senior engineers that builds **automated, self-healing cloud and delivery platforms**, so your teams stop firefighting and start shipping.

AWS | Azure & Azure Gov | GCP | VMware & on-prem

$30M+
saved for clients

99.7%
fewer outages on a 100,000+ user platform

300k+
automated pipeline runs a year

Client results published at mentat.cloud

THE PROBLEM

Your automation program is late, costly, and still mostly manual.

- Changes still depend on tickets, tribal knowledge and late nights.
- Security arrives at the end, so it blocks delivery instead of guiding it.
- Large consulting teams bill for headcount, not outcomes, and the knowledge leaves with them.

WHAT WE DO

A small senior team that builds it right the first time, then hands it to you.

We design and build infrastructure as code, secure CI/CD pipelines, observability and event-driven, self-healing operations, with policy, compliance and security built in from day one. You own everything we build, and your team knows how to run it.

HIRE THE SEALS: MENTAT

- ✔ A few senior specialists, accountable for outcomes
- ✔ Secure by design, not patched at the end
- ✔ Fast, measurable results and a clean handover

THE BIG-FIRM MODEL

- – Dozens or hundreds of consultants who look busy
- – Billed by the hour, measured on activity
- – Done eventually, maybe

PROVEN OUTCOMES

Weeks of manual work → minutes
A financial-sector delivery framework cut manual effort from weeks and months down to minutes.

99.7% fewer outages at scale
Automation platform supporting 100,000+ users cut outages by more than 99%, from several a day to about one a quarter.

Secure, compliant government cloud
Large Azure Government CJIS environment with zero-trust networking and 10-minute deployments.

Safe, low-downtime migrations
800+ virtual machines moved into a modern, secure environment with automated orchestration.

WHY US

- **Elite, senior-only team.** No pyramid of juniors learning on your budget.
- **Security and compliance built in**: policy as code, zero-trust and audit-ready from the start.
- **Any cloud, any toolchain.** We automate what you already run.

WHO IT'S FOR

CIOs & CTOs | Platform & DevOps leaders | CISOs | Government & public safety | Financial services | Regulated enterprises

Bring us the problem your program can't crack.

Start with a no-slide-theater assessment: a maturity scorecard and your next 3–5 moves.
