DRONE & MULTI-SENSOR EVIDENCE

Windtrap

Detect in seconds. Defend for years.

Your sensors handle the next few seconds. Windtrap turns every detection into an **agency-owned evidence record**, with a chain of custody counsel can defend years later.

Vendor-neutral | Agency-owned | Court-ready

THE PROBLEM

Sensors think in seconds. Counsel thinks in years.

- Detection data is scattered across each vendor's console, in each vendor's format.
- When a records request or prosecution arrives, teams rebuild events from screenshots.
- Change vendors, and you can lose the history.

WHAT WE DO

One governed front door for every sensor, and evidence you own.

Windtrap sits behind the detection systems you already have. It seals each record exactly as received, classifies and catalogs it, and keeps a complete history of where every piece of evidence came from and who touched it.

What it isn't: not a detector, jammer or command-and-control system. Keep your detect-and-mitigate vendors; Windtrap makes their output yours.

HOW IT WORKS

Admit
Any sensor, any vendor, one front door

→

Seal
Tamper-evident from the moment it arrives

→

Classify & catalog
Searchable, with full lineage

→

Disclose
Court-ready evidence packages

WHAT YOU GET

Works with the sensors you own
Keep your RF, radar and cameras. Windtrap complements detect-and-mitigate; no rip-and-replace.

Custody that survives the calendar
Retention you can prove, legal hold that follows policy, an audit trail on every access.

Exports counsel can defend
Verifiable evidence packages for records requests, discovery and after-action review.

One trusted picture
Pair with Ornithopter so command and counsel work from the same facts.

WHY US

- **Vendor-neutral.** Your evidence is never locked inside one supplier.
- **Agency-owned.** Your data, your retention rules, your environment.
- **Built by Mentat's elite automation team** for programs that must hold up in court.

WHO IT'S FOR

Law enforcement | Public safety | Corrections | Airports | Critical infrastructure | Stadiums & events | Ports & maritime | Federal & homeland

Own the evidence. Keep your sensors.

Talk to Mentat about a pilot scoped to your sensors, policies and legal requirements.
